
Die Size and Shape Customer Tool

Revised April, 8 2015

Welcome Message

Welcome to the Unique Label, Inc. Die Size and Shape Customer Tool. This document is an ever growing tool for the use of Unique Label, Inc.'s customers to assist them with choosing the exact right die for their needs. Within you will find drawings and technical information for the thousand plus dies available at Unique Label, Inc..

Here are a few items that may make your navigation and use of this document easier and more rewarding.

Sections - The document is broken into several sections to help you find the information you need more quickly. Each of these sections has been bookmarked and can be found in the bookmarks panel on the left side of the window. These sections include:

Cover - The very beginning of the book, useful for making sure you have the most current revision available. Near the bottom of the cover is the date of the last set of revisions. Once the revisions have been made, the updated document will be loaded to the website, and an announcement added to the News section of www.uniquelabel.com. Be sure to check back frequently to verify you are using the most up-to-date version of this document.

Welcome Message - The section you are reading right now, containing the welcome message and useful information on using this document.

Revision Notes - A comprehensive list of revisions to this document, including new dies and features added. Check this section to learn what was updated from the past Customer Die Tool you may have been using.

Circle Dies - This section contains the die drawings for all the currently available circle dies. Including such information as the die number, the size of the die (width x length), and the gap between labels this die will create on the final roll.

Oval Dies - This section contains the die drawings for all the currently available oval dies. Including such information as the die number, the size of the die (width x length), and the gap between labels this die will create on the final roll.

Round Corner Rectangle Dies - This section contains the die drawings for all the currently available round corner rectangle dies. Including such information as the die number, the size of the die (width x length), and the gap between labels this die will create on the final roll.

Laser Printer Sheet Dies - This section contains the die drawings for all the currently available laser printer sheet dies. These die drawings are shown at 75% of their full size. This is done to show all of a full 8.5" x 11" final sheet's information. It also includes such information as the die number, the size of the individual labels on the sheet, the gaps between the individual labels, and the corner radius of the individual labels.

Dater Dies - This section contains the die drawings for all the currently available dater dies. Including such information as the die number, the size of the die (width x length), the corner radius of the die, and the size, position, and quantity of the dater holes.

Circle Die Index - This section is the index for all the currently available circle dies in a listed format. Including such information as the die number, the label size (width and length), the maximum web width available, number of labels across the web, the across cavity and the around cavity.

Round Corner Rectangle Die Index - This section is the index for all the currently available round corner rectangle dies in a list format. Including such information as the die number, the label size (width and length), the maximum web width available, number of labels across the web, the across cavity, the around cavity, and the corner radius.

Die Drawings - Several sections of this document contain die drawings. With the exception of the Laser Printer Sheet Dies which are shown at 75% of full size, these drawings are 100% of the size of the die cut that will occur during the run. When you find a die that you believe will work for your situation, you can print out the page the die drawing is on and cut

out the die drawing to test the size and position on your product, giving you the peace of mind that you have chosen the best die for your needs. Die drawings contain several key pieces of information regarding the die. That information is:

Die Number - Expressed as a letter or letters followed by a numeric code, such as RC0003. The letters represent the type of die it is, C for Circles, OV for Ovals, RC for Round Corner Rectangles and SS for Special Shapes. The number is an unique identifier for that die. If you decide on a specific die from this document and give us the die number listed for it, the die that is used on your job will be exactly what you ordered.

Die Size - This is the Width and Length of the die. The order is important as the Width crosses the web and the Length runs along the web. This is particularly useful if you plan to order labels for thermal printing, or for use with automated labeling devices. To further identify the web direction, all text used with a particular die in a die drawing will run the direction of the web.

Corner Radius - This is the amount of curve on the corners of a rectangular die. The larger the number the more round the corner, the smaller the number the more pointed or sharp the corner will be.

Gap (also called Around Cavity) - This is the distance between the trailing edge of one label to the leading edge of the next label. This information is particularly useful for those with thermal printers or automated labeling devices, as some of these machines require a minimum gap to function properly.

Multi-page Dies - A few of our larger dies require 2, or even 3, pages to render at full size. These dies are easy to identify by the fact they will look incomplete, as if the shape was not finished. These dies will be finished on the next page or pages. The 2 page dies will have the same die information present on both pages. To construct a die replica from these pages, print out both pages and trim the drawing out. The text is positioned in such a way as to assist in the lining up of the two halves. Simply locate the text on both halves, and line up the pieces so that the text directly overlaps on each piece. A piece of tape across the overlap will keep the halves together. For the 3 page dies, the concept is similar but there is a + and an X on the drawings. Print and cut out all three pages and line up the + marks and the X marks. Again, a piece of tape across each overlap will hold them in place.

Printing Instructions - When printing out the pages of this document, please make sure your printer is set to output pages at 100% of size. When printing from Adobe Acrobat there are several options that will distort the size of the printed image, giving you an inaccurate print-out. When printing, you will want to make sure the Page Scaling drop down menu in the Print Handling section, is set to "None". This will give you the most accurate die drawing size.

Revision Notes

In this section you will find a comprehensive list of changes made to this document starting with revision date May 10, 2011. You can use this section to quickly learn what dies and features have been added.

April 8, 2015 - Added Round Corner Rectangle Die numbers RC1074, RC1075, RC1081, RC1083, RC1084, RC1085, RC1086, RC1087, RC1088, RC1089, RC1090, RC1091, RC1092, RC1095, RC1100, RC1102, RC1111, RC1112, RC1114, RC1115, RC1117, RC1119, RC1120, RC1121, RC1122, RC1123, RC1124, RC1125, RC1129, RC1130, RC1131, RC1132, RC1135, RC1136, RC1137, RC1138, RC1139, RC1140, RC1144, RC1146, RC1147, RC1148, RC1150, RC1152, RC1153, RC1154, amd RC1155. Added Circle Die number C1156.
Added links between die drawings and their location in the index, as well as from the index to the drawing.

May 10, 2011 - Added Round Corner Rectangle die number RC0780, RC0814, RC0842, RC0851, RC0855, RC0858, RC0865, RC0866, RC0868, RC0870, RC0871, RC0872, RC0873, RC0874, RC0875, RC0876, RC0877, RC0878, RC0879, RC0880, RC0881, RC0882, RC0884, RC0885, RC0886, RC0889, RC0975, RC0994, RC0999, RC1025, RC1032, RC1047, RC1048, RC1054 and RC1073. Added Welcome Message section. Added Revision Notes section. Added Bookmarks to all sctions for easier document navigation. Added header pages to all section, Reformated document so that all new header pages would appear on the right side page of a spread if this document were duplex printed to ease navigation of a hard copy.

July 29 2009 - Last non-documented revision

Die C-36 is larger than most consumer printers will print. To see the full size of this 8.5" circle, print pages 9 and 10, cut along the die edge on both sheets, lay the 2 sections together (the center text will line up), tape together. This will create a circle the full size of the die cut.
